Call for Papers

Special Issue on AHP/ANP Theories, Applications, and Practices

**Focusing on the Publication of High-Quality and Extended Papers
Presented in AHP/ANP ISAHP2018 and**

Any Other High-Quality Papers in the Areas of the Symposium's Coverage

Editor of the Special Issue:

Prof. Valerio Salomon
Sao Paulo State University, Brazil

Analytic Hierarchy Process (AHP) and Analytic Network Process (ANP) are two of the most widely used multi-attribute decision making (MADM) tools. They have been used successfully in the fields of business, education, engineering, medicine, and social sciences; in governmental and business organizations; and in many other areas of human activities and endeavours. AHP allows decision makers to model complex problems in hierarchical structure while the ANP provides solutions to problems that cannot be structured hierarchically. Both methods help decision makers to prioritize and make the best selections among alternatives in order to achieve the best decision outcome. The needs for new methods and increased use or application of AHP/ANP will continue to grow with the continued developments of new innovations, new trends, and new practices in business and governmental organizations. The main purpose of this special issue is to publish extended papers from works presented at the Fifteenth International Symposium on the Analytic Hierarchy Process (ISAHP2018). Other papers that are within the coverage of the special issue are also welcome. There is a great benefit in publishing your article in this special issue. AMS is growing very rapidly in influence and reputation due to its high quality and standard. It is listed/indexed in many directories and databases (see: <http://www.annalsofms.org/annalsofms.org/Home/IndexingListings.aspx>). Articles published in the special issue will enjoy world-wide circulation and readership. There are no submission fees or publication/page charges. Publishing in AMS is completely free.

Areas of Coverage

Balanced Scorecard
Disaster Management
Educational Planning and Management
Environmental Management & Sustainability
Human Resources Management
Lean/Six Sigma
Logistics
Maintenance
Marketing Decisions
Military Applications

Operations Management
Performance Evaluation
Purchasing and Supply
Project Management
Risk Management
Safety
Simulation
Strategic Planning
Supply Chain Management
Total Quality Management

Guidelines for Authors

Submit papers for the special issue by email to editor@annalsofms.org with “SI on ISAHP 2018” written in a round bracket at the end of the paper’s title. Submitted papers should neither have been previously published nor be under consideration for publication elsewhere.

Every article submitted for the special issue will undergo a double blind peer review process.

Deadlines

Paper submission: January 31, 2019

First notification (acceptance/revision/rejection): April 30, 2019

First revised paper submission: June 30, 2019

Second notification (acceptance/revision/rejection): July 31, 2019

Papers in-press (with DOI, but without page numbers): October 31, 2019

Special issue publication: December 31, 2019
